

Blood Panels Available

Provided by The Office of Dr. Michael Wald

This is just a small sampling of the blood tests that Dr. Michael Wald makes available to his patients. HOWEVER, there is nothing special about ordering lots of tests; what can make the difference in your health is how Dr. Wald "puts it all together".

Dr. Wald earned the nickname, BloodDetective for his talent in applying his medical, nutrition, chiropractic and clinical knowledge allow for deeper meaning and perspective when interpreting tests in context with your health concerns and goals.

Blood tests may or may not be covered by insurance; this depends upon your insurance policy, diagnoses and whether or not your plan allows out-of-network. Speak with Dr. Wald for more details.
