Vs.

Fraudulent Store-Bought Nutritional Supplements

Blood Detective Nutritionals, Inc. was founded by Dr. Wald because most nutritional supplements in some food stores are fraudulent. Read on...

It was also determined that most supplements do not include the actual ingredients that were listed on the label and in some cases have harmful ingredients such as allergens, asphalt, concrete - no kidding!!

Once the New York State Attorney General's Office report came out I knew that I had to do something. For years I knew that supplements in stores were either harmful or inferior to pharmaceutical grade. How did I know? I had done an on-air report for FOX news almost a decade before the Attorney General's Office came to light, but some of my patients did not believe it because it still was not common knowledge.

I suggested the story to FOX because I had too many patients over the years come to me with their own lists and bags of nutritional supplements that should have worked!! But these patients were not getting better. This is why I started Blood Detective Nutritionals, Inc - I had to give my patients the highest quality supplements possible.

Dr. Wald has personally formulated over 75 different kinds of nutritional supplements to fit the needs of almost any health problem. These pharmaceutical grade nutrients can be viewed at BloodDetective.com.

Blood Detective Nutritionals, Inc. Available only to the patients of Dr. Michael Wald.
